

Wrought Iron – The Perfect Stair Spindle Material

<https://www.stairwarehouse.com/iron-balusters.html>

Strength & security:

- Wrought iron is tough & durable, and will offer the strength that you need to make sure your property is truly safe. If you've ever vacationed in a rustic hotel with wooden balconies, you have most certainly felt insecure walking up the staircase. Cheap wood spindles can decay, flex & bend, and it can be susceptible to wood worm. On the other hand iron balusters are tough, durable, and will last for years.

Low in maintenance:

- Wrought iron will always triumph over other forms of stair spindles when it comes to maintenance. If coated & painted properly your iron will not rust or fade. Not like a decayed wooden railing that'd requires replacement, Iron spindles can be repaired or restored when needed.

Aesthetic appeal:

- Wrought iron balustrades can be designed to fit any property whether old or new. Curving balustrades with intricate designs will look great in your historic property, while modern designs in oil rubbed bronze or Ash Grey will look fabulous in your modern property. Iron balusters will infuse both visual appeal & value to any home.
