Botox, derived from botulinum toxin, is a neuromodulator that temporarily relaxes muscles, reducing the appearance of dynamic wrinkles caused by repetitive facial expressions. Fillers, on the other hand, are injectable gels made from hyaluronic acid or other biocompatible materials, used to restore volume and contour to areas of the face that have lost elasticity and fullness over time. By combining these two treatments, Dr. Kavina Puri can achieve comprehensive facial rejuvenation, resulting in a refreshed and revitalized appearance.
