However, if your country has not yet integrated with PayPal (such as Japan), then there are other options available which can be used instead:

- For depositing payments from credit cards through Visa/MasterCard networks outside Europe and Asia – this option requires connecting the card's number directly when making a transaction; however there may be fees associated with this method depending on which service provider is used by each country involved (e.g., [Bank Transfer](#)). This option also does not allow users from countries where Visa/MasterCard network does not operate such as India or China so please check first before proceeding further down line!
