In these early societies, couches were a symbol of status and were often used during social gatherings and banquets. These early couches were typically made of wood or stone and adorned with cushions for comfort.

Medieval and Renaissance Era

During the medieval and Renaissance periods, couches became more ornate and were often carved with intricate designs. They were still considered a luxury item and were reserved for the wealthy and nobility. The evolution of couches during this time saw the introduction of more elaborate upholstery and fabrics, adding to their comfort and elegance.

Industrial Revolution and Mass Production

The industrial revolution marked a significant turning point in the evolution of couches. With the advent of mass production, couches became more accessible to the general population. The use of new materials such as steel and synthetic fabrics revolutionized the manufacturing process, leading to a wider variety of styles and designs.
