

# Top Telescopic Channel Manufacturers In India: A Comprehensive Guide

Drawer runners are also referred to as telescopic channels, and are typically found in drawers used to store items. They are long, slender hardware gadgets that make closing and opening the drawer easier and more straightforward.

Mounted on the drawer sides, telescopic drawer channels have a gliding motion due to ball-bearing slides. This mechanism includes a pull-out stop and a roll-out guard for an effective, smooth motion.

## Inception of Telescopic Channels

Since the advent of modern furniture and cabinetry, **telescopic channel manufacturers in India** have made these for the smooth functioning of drawers in kitchens, cupboards, and vanities. With a 35 Kg to 45 kg weight carrying capacity along with a soft-closing or regular-closing option, this system is the best solution for enhancing kitchen functionality. As consumers' purchasing power grows along with economic prosperity, premium furniture makers have been using these drawer runners in residential, commercial, and industrial sectors worldwide.

## What is the need for a Telescopic Drawer Channel?

Telescopic Drawer Channels and runners are necessary for drawers to operate smoothly without getting stuck and for you to be able to reach the farthest corner of the drawer without a struggle.

## Types of Drawer Channels

With the growing demand for these telescopic drawer channels, **drawer channel manufacturers in India** have been providing variations in these channels for your convenience. Let us look at some of the types:

1. **Regular channels:** These are the most basic of the type, but they are made of good-quality materials and have good load-bearing capacity. They are placed horizontally on the sides of drawers.
2. **Push-to-open channels:** As the name suggests, these channels need a light or feathered touch to open or close a drawer smoothly.
3. **Soft-close channels:** These come with a hydraulic damper to reduce the speed at which the drawer closes, allowing the drawer to glide softly into the cavity. Thanks to the latch mechanism, the drawers can also be removed for cleaning.
4. **Heavy-duty channels:** As the name implies, these channels are quite robust and offer adequate strength in cases of heavy load storage. This drawer channel is engineered to bear heavy loads and is best used in Industrial applications and commercial purposes.

## What makes E3 Telescopic Drawer Channels unique?

E3 Group is popularly known to provide innovative surface product solutions for Interior and Exterior. With an extensive network of dealers and distributors across India, the brand has been continuously evolving for the past three decades and providing solutions to stay on the leading edge of development and trends in this sector.

**E3 Delta Telescopic Channels** are an investment that brings European technology to your doorstep with controlled extension and retraction. These channels have been crafted using the best top-tier cold-rolled steel and are available in two finishings, namely CD black coating and Zinc finish.

## Other Telescopic Channel Manufacturers In the Indian Market Scenario

1. **Hettich India Pvt. Ltd.** has been in the Indian market for quite some time and is known for crafting hardware solutions that blend technology, practicality, and style.
2. **Hardwyn** – They manufacture hardware and glass fittings for residential and commercial use.
3. **Khetan Udyog** is a manufacturing company that makes drawer slides for industrial purposes, kitchen cabinets, and commercial use.
4. **Gamma Fixtures**—Located in the South, they are known to manufacture furniture fittings such as drawer slides, hinges, door locks, and glass fittings.

To conclude, Telescopic drawer channels have been around since the early 20th century, and they have been known to advance significantly, along with a number of varieties that have become available in recent times. They have revolutionized the way modern cabinets and drawers work and have completely changed the way we access drawer contents with ease. **Telescopic Channels Manufacturers in India**, like E3 Group, manufacture drawer channels with top-quality steel and European technology as they have become a necessary part of the furniture industry. These channels are expected to continue developing and playing a significant role in our lives.
