

§ 201.14(a) (1) (ii) The following definitions apply to this section: (A) "Device" means any apparatus, machine, or instrument, including any component part, that is intended for use to deliver any drug to the human body, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(b) Inhalation Device

§ 201.14(b) (1) Inhalation device means a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

- MTL (Mouth to Lung) — a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
- DTL (Direct to Lung) — a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
- RDL (Restricted Direct to Lung) — a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(b) (2) Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(c) Inhalation Device

§ 201.14(c) (1) Inhalation device means a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

1. Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
2. Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
3. Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(c) (2) Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(d) Inhalation Device

§ 201.14(d) (1) Inhalation device means a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

- Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
- Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
- Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(d) (2) Inhalation device also includes any device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.

§ 201.14(e) Inhalation Device

§ 201.14(e) (1) Inhalation device means a device that is used to deliver any drug to the human respiratory system, and includes any device that is used in the process of manufacturing, packaging, or distributing a drug.
