

## High-Quality Cleanroom Workbenches With 316 Stainless Steel Surface

Our focus at Superlift is to offer the proper material handling products as well as services to suit the client's needs by serving ergonomic products with optimized standards of performance and durability. Cleanroom workbenches with 316 stainless steel surface is specifically one of our specialized products used for industries where cleanliness, hygiene, and corrosion resistance play a major role. Cleanroom workbenches are important furniture in pharmaceutical, biotech or high technology manufacturing, among others; and we present you high quality products featuring durability and practicality.

### Why Choose 316 Stainless Steel for Cleanroom Workbenches?

Cleanroom concerns require exact results and sterility, and the material used is critical to achieving these states. Accordingly, 316 stainless steel is ideal for cleanroom workbenches since it is highly resistant to rust, particularly in chemically aggressive conditions. Compared to other stainless steels ferrels, 316 is able to resist pitting and corrosion well, which can be a big plus in applications which require frequent deep cleaning and sterilization.

Superlift knows the special requirement of cleanroom hence we offer our Cleanroom workbenches with 316 stainless steel surface that can easily be cleaned without loosening the strength of the workbenches or scrapping off the surface due to corrosion in case it is exposed to aggressive chemicals. The smooth surface also prevents undesirable particles or bacteria buildup and makes cleaning as well as maintaining this piece of equipment easy.

## **Versatility and Customization**

It's not only that our cleanroom workbenches are clean, robust and designed to provide contamination-free working environment, they are also highly adaptable. At Superlift, all of our designs include a number of standard features that are fully adjustable to also provide the features you need for your situation.

## **Ergonomics and Efficiency**

In Superlift, ergonomics are given topmost priority while designing all our products. Our Cleanroom Workbenches have an easy clean 316 stainless steel top which makes it easier for operators to work on, thereby reducing the percentage of employees getting injured on the line. For any type of work that may require careful handling of products or necessary heavy lifting, workbenches give the necessary support and attributes for work in your cleanroom.

## **Built to Last with Unmatched Customer Support**

Each of the products we sell cater for the harshest environments in the market. Beginning with the materials and continuing with the engineering required to construct each model, Superlift makes it a point to guarantee that your investment in cleanroom workbenches will last. And it is not just our superior product that helps us get ahead, our superior customer service and warranty speaks for itself.

## **Conclusion**
