

# Andrologist Dr. Haryana: Superior Male Health Care Guru Jambheshwar Multispeciality Hospital

Guru Jambheshwar Multispeciality Hospital in Haryana is the top place for special male healthcare. The hospital also has the best andrologist physicians treating men's reproductive and urological diseases. Andrology diagnoses and treats problems with male fertility, sexuality, and hormonal disorders in patients with complete solutions.

## Expertise in Male Health

Our andrologists at [Guru Jambheshwar Multispeciality Hospital](#) are experienced in the treatment of:

**ED:** Diagnostic technology, medicines, injections, surgical implants, etc for Erectile Dysfunction (ED).

**Male Infertility:** Treating conditions such as low sperm count, poor movement, or blockages using testicular biopsy, varicocele repair, and ART.

**Premature Ejaculation:** Effective treatment, either behavioral therapy, medication, or surgery.

**Peyronie's Disease:** Curving a penile with minimally invasive surgeries or injections.

**Low Testosterone Levels:** Treating hormone disorders through testosterone replacement therapy.

## State-of-the-Art Diagnostic and Treatment Options

Guru Jambheshwar Multispeciality Hospital is backed up by the latest technology for accurate diagnosis and treatment. The diagnostic procedures include:

**Hormonal Test:** To check testosterone and other hormone levels.

**Semen Analysis:** To check sperm condition.

**Ultrasound:** for structural abnormalities in the womb.

**Test of Genetics:** Diagnose genetic diseases that impact fertility.

The hospital also provides modern treatments according to patients' needs and success rates for patients.

### **Personalized Care for Patients**

The andrologists at Guru Jambheshwar Multispeciality Hospital care for the patient. All the treatment protocols are developed with a full analysis of the patient's medical history, lifestyle, and needs. Ayurvedic therapy is also offered for the emotional and psychological side of male illnesses as part of holistic care.

### **Minimally Invasive Procedures**

Drastically less invasive interventions are typical of the hospital's andrology unit. Such surgeries guarantee fewer painful and faster healing times and scars. Commonly performed procedures include:

**Microsurgical Varicocelelectomy:** To close large scrotum veins for fertility.

**Penile Implant Surgery:** The answer to severe erectile dysfunction.

**TESE (Testicular Sperm Extraction):** for sperm in non-obstructive azoospermia.

Addressing Male Infertility

Male infertility is an urgent issue, and the hospital's andrologists coordinate care with the fertility specialists. For couples who are unable to conceive, there are procedures like Intracytoplasmic Sperm Injection (ICSI) and Intrauterine Insemination (IUI). Such treatments have allowed thousands of families to become parents.

### **What Is Guru Jambheshwar Multispeciality Hospital?**

**Experts:** We have well-trained andrologists in the hospital with many years of experience.

**Complete Services:** Everything male-related is handled, from diagnosis to treatment and counseling.
